

# My Triumph Connectivity Module

## Bluetooth® Functionality

---

*Bluetooth*® functionality may vary due to hardware and software versions of the *Bluetooth* devices, individual device settings, phone book size, contact storage method and available memory.

Software updates on phones may impact *Bluetooth* connectivity functionality and performance.

Triumph cannot provide any guarantee of complete functionality between a *Bluetooth* device and the motorcycle.

Some functionality may not be fully supported in all markets.

The devices listed below have had their core functionality tested with the Triumph Connectivity Module. There may be devices not listed that may allow limited functionality.

Triumph reserves the right to modify the list of devices without notice.
